

UWB Remote Control

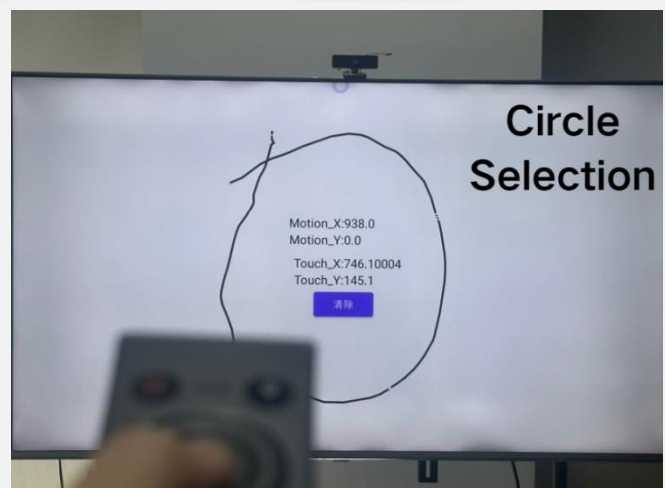

Absolute pointing interaction | Flexible touch interaction | Voice control interaction

A remote control with touch functionality

A remote control with laser-pointer-like precise pointing

A remote control that lets you operate the big screen just like using a smartphone

Absolute pointing interaction breaks free from the operational limitations of traditional remote controls, making selection easier and more effortless.

it's efficient and convenient, with "what you point at is what you get," allowing you to enjoy a smooth control experience.

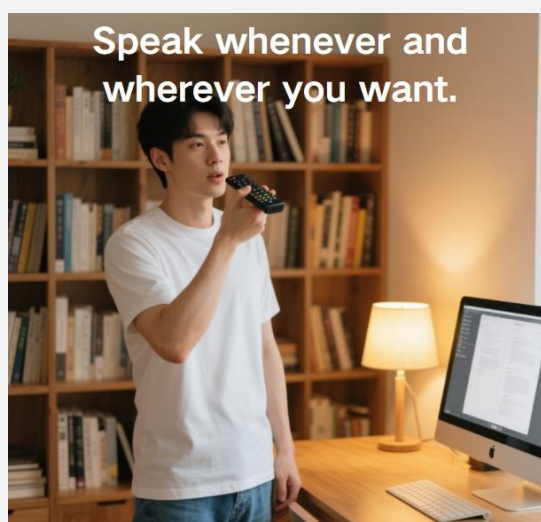

Inside lies a universe of wonders and boundless wisdom. It enables two-way interaction with the remote control, achieving precise positioning.

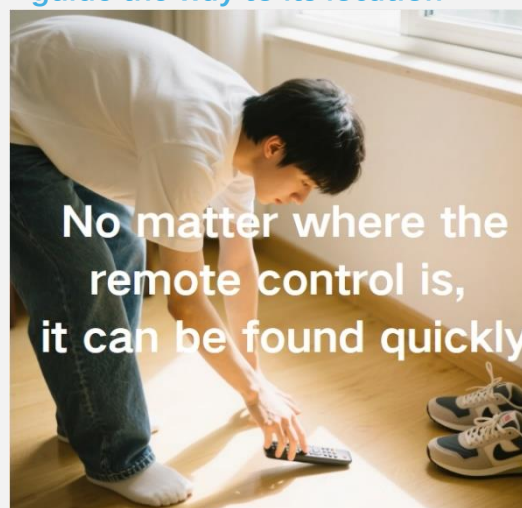

UWB receiver module

Voice control interaction

Speak whenever and wherever you want.

The remote control will emit a beeping sound to guide the way to its location

No matter where the remote control is, it can be found quickly
